

2020 Prices for Meteorological Data (Prices are valid to 31 December 2020)

ADM provides a full range of meteorological data (met data) suitable for use within all the frequently used dispersion models.

The formats available include:

- ADMS
- ISC (for BREEZE Roads)
- AERMOD

In addition, ADM can provide windroses, hourly meteorological data records and digital terrain data suitable for direct input to AERMOD for world-wide locations

Data from any of more than 13,000 World Meteorological Office (WMO) observing stations are usually provided within 24 hours of an order.

Cost for hourly ADMS, ISC (BREEZE Roads) format meteorological data or a windrose from a single observing station (eg cost for a single five-year average windrose is £190+VAT).

| Number of Years | Cost (GBP (£) excluding VAT) | |
|-----------------|------------------------------|----------|
| | ADMS or ISC | Windrose |
| <6 Months | 230 | 85 |
| 1 | 380 | 105 |
| 2 | 475 | 125 |
| 3 | 560 | 150 |
| 4 | 650 | 170 |
| 5 | 720 | 190 |
| 6 | 770 | 205 |
| 7 | 830 | 220 |
| 8 | 880 | 235 |
| 9 | 940 | 250 |
| 10 | 990 | 260 |
| 15 | 1,290 | 300 |
| 20 | 1,590 | 335 |

Additional £130+VAT if AERMOD format is required.
 Additional £130+VAT if both ADMS and ISC format are required.
 Additional £60+VAT if dry hours windrose is required.
 Additional £30 for each additional windrose from same observing station.
 A discount of 10% is offered when purchasing five or more ADMS or ISC format data sets (from five or more different observing stations) at one time.

Data provided in Excel for a maximum of four parameters can be provided at 10% discount to the cost for ADMS format met data.
