

**2023 Prices for Meteorological Data (Prices are valid to 31 December 2023)**

[www.AboutAir.com](http://www.AboutAir.com)

ADM Ltd provides a full range of meteorological data (met data) suitable for use within all the frequently used dispersion models.

The formats available include:

- ADMS
- ISC (for BREEZE Roads)
- AERMOD

In addition, ADM Ltd can provide both 'all hours' and 'dry days' windroses.

Data from any of more than 13,000 World Meteorological Office (WMO) observing stations are usually provided within 24 hours of an order. NWP data can also be provided within 24 hours of an order being placed.

The following table shows the cost for hourly ADMS, ISC (BREEZE Roads) format met data or a windrose from a single observing station or single location for NWP data.

Number of Years	Cost (GBP (£) excluding VAT)	
	ADMS or ISC (Observed or NWP)	Windrose from Observed Data (£75+VAT additional charge if NWP required)
<6 Months	220	75
1	370	95
2	460	115
3	550	135
4	630	155
5	710	175
6	760	190
7	810	205
8	860	220
9	910	230
10	960	240
15	1,160	275
20	1,310	310
Additional £110+VAT if AERMOD format is required. Additional £110+VAT if both ADMS and ISC format are required. Additional £50+VAT if dry days windrose is required. Additional £30 for each additional windrose from same observing station. A discount of 15% is applied when purchasing three or more ADMS or ISC format data sets at one time. A discount of 10% is applied for data required only in Excel format.
